The MAILING DATE of this communication appears on the cover sheet with the correspondence address Period for Reply								
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 5 and 6 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 5, the term benefite is considered to render the claim indefinite since it is not cleat what class of titanium compounds this encompasses.

Claim 6 is not considered to further limit claim 1.

Claim Rejections - 35 USC § 102 and 103

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 5. Claims 1-4,6-14 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Menschner et al (4,501,778).

Application/Control Number: 10/608,124

Art Unit: 1755

Menschner et al teach a metal effect enamel; composition including a base glass (column 1, lines 32-39) and 5-25 wt% of a colorant portion including 30-80 wt% MnO_2 , 1-20% CuO, .1-50% TiO_2 and .01-20% NiO (column 1, lines 39-47 and examples in the table of column 2). The compounds CoO and Fe_2O_3 may also be added (column 2, lines 13-15). The frit composition is applied to a ceramic substrate and fired at a temperature of 950 to 1300° C.

The claims are considered anticipated or in the alternative the subject matter as a whole would have been obvious to one having ordinary skill in the art at the time of the invention to have selected the overlapping portion of the range disclosed by the prior art because overlapping ranges have been held to be a prima facie case of obvious, see In re Malagari, 182 U.S.P.Q 549.

Claim 5 is excluded from the rejection over Menschner et al because the reference fails to teach or fairly suggest the specific porcelain composition. Claim 15 is excluded from the rejection because Menschner only teaches applying the composition to a ceramic substrate.

6. Claims 1,6,11 are rejected under 35 U.S.C. 102(b) as being anticipated by SU 988785.

SU 9887858 teaches an enamel composition including .7-.9 NiO, 5.-8.3 TiO₂ and 3.5-5.2 MnO₂, which ranges fall directly within the claimed ranges. The claims are considered anticipated. It is noted the taught ranges are completely within the scope of the claimed ranges.

Art Unit: 1755

Conclusion

7. Claim 15 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

- 8. Claim 5 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.
